What makes the SuperFlush the best outboard flusher?

The SF 200's advanced technology is able to do what no other outboard flushing system can! It's multi-point injection and hydra shock technology blasts salt and build up out of difficult to reach places that no other method can. It will:

DOUBLE ENGINE LIFE
REDUCE MAINTENANCE
INCREASE RELIABILITY

NO NOISE
NO EMISSIONS
NO POLLUTION

The SuperFlush Patented technology works by accelerating thousands of high pressure shock pulses per minute through multi-port injectors that blast SALT...even built up deposits out of your engine using only water from your faucet. NO other system works as fast, effectively, or with a

ZERO CARBON FOOTPRINT.

SUPERFLUSH ADVANCED CORROSION CONTROL TECHNOLOGY CAN DOUBLE YOUR ENGINES LIFE & REDUCE CORROSION DAMAGES BY 50%!!!

Do I Need a SuperFlusher?

Every boat owner who boats in saltwater should be SuperFlushing to obtain maximum life and performance from their engine. The U.S. National Marine Manufacturers reports that salt water related corrosion damage is responsible for 70% OR MORE, of marine engine failures on boats used in the ocean.

Why?

Easy & Convenient to Use.

Simply connect a water hose to the Easy Access panel and turn on as show in photo to left. If you own twins or triples, then the incredible ACS system is the answer! Hook up a hose and push a button!! Shown below left.

It's the best way to protect your expensive marine engine from the ravages of salt water corrosion! Nothing else is even close to being as effective!

Saves Time & Money! Since you don't run your engine with the SuperFlusher, you don't burn ANY fuel. Most factory systems DO REQUIRE that you run the engine for 18-22 minutes, and that costs money.

A properly maintained and SuperFlushed marine engine can last TWICE as long as an engine flushed with any other technology, as proven by U.S. Army Tests & Evaluations.

With SuperFlush No SuperFlush

Applications for your Boat

Outboard Motors

The SF 200C series is designed to be affordable and easy to install on most popular brands, including Evinrude, Honda, Mercury, Suzuki, and Yamaha, from 40-350 horse-power, 2 & 4 Stroke engines. All kits comes complete with everything needed.

Fully Automatic Systems for 2,3,4 Outboards

If you own a twin, triple or quad powered Rig, you owe it to yourself to have the ACS System. You can DOUBLE your ENGINE Life, Increase Reliability, and Reduce Maintenance required from Salt Water Exposure!!

Supercharged or big cubic inch outboard motors live hard and all too often have a short life span. Corrosion is a KILLER! The best way to protect your expensive investment is the SUPERFLUSH ACS Anti-corrosion system.

This incredible technology is PROVEN to be the best marine engine flushing system ever, by U.S. Army tests. For a snapshot at cost savings and benefits take a look at the chart below

Fuel Costs to Flush over 5 years.	SuperFlush	Conventional
Yamaha 350s	0 \$	2,780.05
Merc Verado 350s	0 \$	1,892.80

Time to Flush over 5 years.	SuperFlush	Conventional
Yamaha 350s	32 hours	130 hours
Merc Verado 350s	32 hours	130 hours

Doubling Engine Life With SF	MSPR	X 3	Flgging	Replacement \$
Yamaha 350	\$ 28,550.00	\$ 85,650.00	\$ 5,000.00	\$ 90,650.00
Merc Verado 350	\$ 28,800.00	\$ 86,400.00	\$ 5,000.00	\$ 91,400.00
