SUPERFLUSH™

CLEAN & GREEN

Engine Flushing Technology™

No noise, No emissions, No pollution

- ✓ **Extends Engine Life**
- ✓ **Reduces Costly Repairs**
- ✓ **Saves Money**

STATE-OF-THE-ART marine engine flushing and corrosion control system designed for outboard motors, sterndrive, and inboard engines.

- **Hassle-Free Flushing**
- **Saves Time**
- **Unattended Flushing**

OUTBOARD SYSTEM

Flushing your outboard engine is part of the boating lifestyle.

SuperFlush provides the best marine engine flushing technology for outboard engines.

Our patented technology blasts away corrosive build up in your outboard engine and extends the running hours: protecting your engine and your lifestyle.

For single or multiple outboard marine engines, SuperFlush is the perfect marine engine flushing solution.

The SuperFlush SF 200C Series

Designed to be affordable and installable on most popular brands, including Evinrude, Honda, Mercury, Suzuki, and Yamaha, from 40-350 horse-power, 2 & 4 Stroke engines. Kit comes complete with everything needed.

Part # SF-200C

The SuperFlush ACS-3S Auto Flusher

Ideal for twin and triple engine large displacement outboards. Built from the best Stainless and Alloy components. Digital status readout and a built in flush counter keeps track of maintenance. Fully automatic, turn on main power, attach a water hose and it flushes all engines in 15 minutes then shuts off. Works in or out of the water. New EZ install kits for Mercs, Yamahas, Suzuki's, Honda, and Evinrude's. A must have for any boat with triple's on it.

Part # ACS-3S

CLEAN & GREEN

INBOARD & STERN-DRIVE SYSTEM

Inboard and stern-drive marine engines run hotter and harder — as a result accumulate corrosive build up faster.

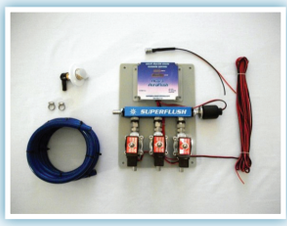
The patented SuperFlush technology designed for the unique needs of inboard and stern-drive engines removes corrosive build up from these marine engines and systems.

Whether your boat is a pleasure cruiser or a working boat, SuperFlush provides the added protection that keeps your engine clean and your boat sailing to the next destination.

SF 400C for gas Sterndrive and I/O's, SF 400D for diesel Sterndrive and In-boards

(4.0 Liters or less) make it easy to flush the damaging salt water out of your engine, with your boat in or out of the water! Fits Ford and GM based gas engines, MerCruiser, Volvo Penta, and Caterpillar, Cummins, Yamaha, and almost every other brand of marine diesel, raw and closed cooled.

Part # SF-400C



The SuperFlush SF Series Auto Control

Designed to work with every SuperFlush product. It will automatically flush every seawater cooled engine or device onboard including boats with 2, 3, or 4 engines, inboard or outboard, gas or diesel. The SF Auto Control is also ideal for use with generators and water cooled air conditioning systems.

Part # ACS-3
